

Joonas Tanner

Senior Web Developer at Paf (Ålands Penningautomatförening)

joonas@luckydreamer.com

Summary

I have been a professional web developer since 2002. I have done a lot of things, from creating static and dynamic web sites and intranets to designing and building a content management system, and managing large back-end systems with millions of rows of critical data.

In recent years, my interest and expertise have leaned towards front-end development. I know HTML and CSS throughout, and have learned the best practices through experience - although the beauty of web development is that there is always room for improvement and new tricks to learn. For example, the time to start using HTML5 and CSS3 on a bigger scale is now - as long as we degrade gracefully in non-supported browsers.

For client-side scripting, I fell in love with jQuery years ago. I'm no stranger to hand-coded JS either, but if I can avoid browser hacks and reinventing the wheel, I will. I'm also curious about frameworks such as Backbone.js for larger-scale web apps, and Node.js for building scalable web apps with server-side JavaScript.

I have experience with many content management systems, such as various PHP-based CMS systems (Typo3, CMS Made Simple etc.), but also with enterprise-level systems such as the .NET-based SDL Tridion 2009, Microsoft Office Sharepoint Server (of which I have two Microsoft certificates) and NAS 5. I also have experience with the Java-based OpenCms system.

Currently I work for an online gaming company, so there is a special emphasis on security and scalability. Usability is also important to me, and I try to give improvement ideas for designers to think about, to make for a better end product.

I learn new things quickly, but I am the first to admit if I'm not 100% sure about something. I'm honest and take pride in my work. I'm also an excellent problem solver and debugger, so co-workers often come to me for help when they're stuck.

To sum it all up, I am a web developer with years of experience, but who is still improving and always keen to learn new things.

Specialties

Front-end web development, CMS systems, (X)HTML, HTML5, CSS, JavaScript, jQuery, AJAX, JSON, XML, Photoshop, Web Standards, Web services, Usability, PHP, SQL and database design

Experience

Senior Web Developer at Paf (Ålands Penningautomatförening)

March 2010 - Present (1 year 11 months)

Working mostly with Front End and CMS development in Agile, multi-cultural development teams. Some of the techniques used in the work include XHTML, CSS, JavaScript / jQuery, AJAX/JSON, JSP etc. As a Senior Web Developer I am also responsible for investigating new, emerging technologies (HTML5, CSS3, JavaScript frameworks etc) and acting as our internal CMS "guru" (training our content editors etc).

Paf is a gaming company which donates 100% of its profits to charity. Paf is an international company with almost 20 different nationalities amongst the employees. English is the official company language, which is used in all internal communication, documentation and most of the meetings and day-to-day work.

Paf is mostly a "Java house", so I have gained a lot of experience in Java-based systems and infrastructure while working here. Also since we operate within the online gaming industry, there is a special emphasis on security.

Owner / Web Developer / Consultant at Lucky Dreamer

March 2009 - Present (2 years 11 months)

Web development and consultancy work using my own company name.

Senior Web Developer at Endero Oy

April 2007 - March 2010 (3 years)
